## Education

<b>Purdue University</b> <i>Bachelor of Science (B.S.) in Computer Science, Game Development and Design</i> <ul style="list-style-type: none"><li>Dean's List &amp; Semester Honors 2020 – Present</li><li>GPA: 3.59/4.0</li></ul>	May, 2020 – Dec, 2024 West Lafayette, IN
---	---

## Specialized Skills

**Programming Languages:** C & C++, Java, Python, R, SQL, JavaScript, HTML, CSS  
**Tools:** OpenCV, Tensorflow, PyTorch, Unix/Bash, Git, ROS, Latex, React, Node.js, Flask, Unreal Engine, Maya  
**Courses:** Analysis of Algorithms, Artificial Intelligence, Data Mining & Machine Learning, Robotics, Systems Programming, Information Systems, Data Structures and Algorithms, Computer Architecture, Programming in C  
**Certificate:** NVIDIA DLI for completion of Fundamentals of Deep Learning – 2022

## Research Experience

<b>Undergraduate Research Fellowship</b> <i>Jain Research Lab</i> <ul style="list-style-type: none"><li>Developed a high-fidelity Level II driving simulator using Unreal Engine 5, supporting various driving scenarios set in a dynamic city environment for human subject experiments</li><li>Engineered a modular framework for fast building of experimental trials, granting researchers full creative control</li><li>Implemented numerous data collection strategies such as devising segmentation data for gaze mapping and fixation identification, laying the groundwork for a comprehensive modeling of human cognition</li></ul>	May, 2023 – Present
--	---------------------

<b>Undergraduate Researcher</b> <i>Purdue Data Mine</i> <ul style="list-style-type: none"><li>Developed a real-time computer vision based solution for pet identification and pose detection for Elanco</li><li>Designed and implemented a deep neural network using PyTorch for pose classification</li><li>Employed a combination of transfer learning and hyperparameter tuning to optimize the performance of an existing object detection model, enabling accurate breed classification</li></ul>	Aug, 2022 – May, 2023
---	-----------------------

<b>Undergraduate Researcher</b> <i>Purdue RoboMasters</i> <ul style="list-style-type: none"><li>Developed an inhouse synthetic data generation pipeline for object detection in robotics competition</li><li>Utilized Autodesk Maya to build photo-realistic virtual environments with numerous randomizable parameters</li><li>Enabled detection of unseen classes and improved model performance and generalizability by 16%</li></ul>	Aug, 2022 – May, 2023
---	-----------------------

## Project/Other Experience

<b>Undergraduate Teaching Assistant</b> <i>Purdue University</i> <ul style="list-style-type: none"><li>Leveraged experience in Systems Programming and held lab sessions</li><li>Took a proactive approach in mentoring students, offering individualized support through complex concepts</li></ul>	Jan, 2023 – May, 2023
---	-----------------------

<b>PROS Kernel Developer</b> <i>Purdue ACM SIGBots</i> <ul style="list-style-type: none"><li>Maintained and optimized the globally utilized PROS Kernel software, ensuring a high-performing and reliable platform for VEX Robotics teams to code their competition robots</li><li>Collaborated on the development of an autonomous mode for competition robot in VEXU, leveraging control algorithms including PID controller and Odometry for precise robot model prediction in run-time</li></ul>	Aug, 2022 – Present
---	---------------------

<b>Lets-Ride Project</b> <i>Purdue University</i> <ul style="list-style-type: none"><li>Led full-stack development to create a robust platform hosting NFL match predictions and team statistics</li><li>Designed interactive web pages utilizing React and Node.js, elevating user experience</li><li>Maintained and optimized a comprehensive team database by leveraging PostgreSQL</li></ul>	Aug, 2022 – Dec, 2022
---	-----------------------

<b>COSINE Tutor</b> <i>Purdue COSINE</i> <ul style="list-style-type: none"><li>Collaborated with students to work on challenging subjects such as Multivariate Calculus and Linear Algebra, enhancing their understanding on the subject while promoting growth of problem-solving skills</li><li>Provided individualized attention while factoring in their current grasp on the topic, meeting their diverse needs</li></ul>	Aug, 2022 – Present
---	---------------------
